

Recycled Water Onsite Supervisor Do's and Don'ts

DO'S

- 👍 Install and maintain signs at all points of entry (pedestrian and vehicular);
- 👍 Install and maintain labels and tags on recycled and potable water systems;
- 👍 Operate irrigation system:
 - Between 9 p.m. – 6 a.m. if automatically controlled (unless other restrictions apply).
 - At other times if manually controlled and supervised (someone present) to make sure the recycled water doesn't come in contact with the public;
 - At any time if use site is restricted to the public- use quick couplers instead of hose bibs;
 - Efficiently to conserve water and reduce run-off;
- 👍 Contact water provider if any water system (recycled or potable) modifications are anticipated;
- 👍 Immediately contact water provider if any one of the following has occurred:
 - A recycled water line break, spill, or off-site discharge;
 - A violation of water recycling requirements;
 - A cross-connection between the recycled and potable water systems;
- 👍 Educate/train site workers on safe use and restrictions of recycled water;
- 👍 Keep records and as-built drawings up-to-date and accessible;
- 👍 Assist and cooperate during periodic visual inspections;
- 👍 Assist and cooperate during periodic cross-connection testing
- 👍 Wash hands with soap and clean water after exposure to recycled water.

DON'TS

Recycled Water Onsite Supervisor Do's and Don'ts

- ☞ Don't drink the recycled water;
- ☞ Don't use recycled water to wash hands or any other part of the body;
- ☞ Don't remove the water identification signs, tags or labels;
- ☞ Don't cross-connect two dissimilar water systems (recycled to potable);
- ☞ Don't allow recycled water to pond or puddle;
- ☞ Don't allow recycled water to contact drinking fountains or eating areas;
- ☞ Don't allow recycled water to runoff the use site property by either overspray or over watering;
- ☞ Don't use recycled water on an unapproved site;
- ☞ Don't put hose bibs on recycled water systems (unless public is restricted);
- ☞ Don't use the same equipment on both recycled water and domestic water systems (for example, quick couplers, tools, etc.);
- ☞ Don't modify any water system without prior approval of water provider and/or Health Department.
